Version 3

The impact of graft-versus host disease prophylaxis in
reduced-intensity conditioning allogeneic stem cell transplant in acute
myeloid leukaemia: a study from the Acute Leukemia Working Party of
EBMT

Disclosures: MM reports grants and personal fees from SANOFI, grants and personal fees from PIERRE FABRE, during the conduct of the study. The other authors have no conflicts of interest to report.

Contributions: MTR, MM and ML designed the study. ML collected the data from the database of the ALWP of the EBMT (chaired by MM and AN). DB, GS, XX, PC, XX, SV, AH, CEB, AS, XX were the principal investigators of the 11 highest recruiting centers of the study. ML, MTR, MM analysed and interpreted the data. MTR, ML, MM and AN wrote or revised the manuscript, and all authors reviewed its final version.
