

Haematologica  
HAEMATOL/2014/118299  
Version 4  
Analysis of Phenotype and Outcome in Essential Thrombocythemia  
with CALR or JAK2 mutations

Disclosures: The authors declare no conflict of interest.

Contributions: Carla AL Assaf performed the experiments, statistics, analyzed the data and wrote the manuscript. Johan Billiet, Timothy Devos, Carlos Graux, Florence Van Obbergh, Lucienne Michaux, Jan Emmerechts and Anne-Sophie Hervent referred samples and provided clinical information. Thomas Tousseyn and Pascale De Paepe analyzed the bone marrow biopsies. Petros Papadopoulos and Els Lierman critically reviewed the manuscript. Florence Van Obbergh and Lucienne Michaux collected the clinical and hematological information of the patients. Peter Vandenberghe designed the study, analyzed the data, and wrote the manuscript.
