Version 4

Minimal residual disease analysis by eight-color flow cytometry in
relapsed childhood acute lymphoblastic leukemia

Disclosures: The authors declare no conflict of interest

Contributions: All co-authors were involved in the design of the study, reviewed manuscript drafts and approved the final manuscript. LK and CE collected and analyzed data and wrote the initial manuscript; MD, RR, PR, and AvS contributed to the data; MD, EM, GB, BB, OH, and KS reviewed and provided critical input during manuscript writing.
