Azacitidine as post-remission consolidation for sorafenib-induced  
remission of Fms-Like Tyrosine Kinase-3 internal tandem duplication  
positive acute myeloid leukemia

Disclosures: Sorafenib is supplied by Bayed Healthcare Ltd and azacitidine was a generous gift from Celgene Ltd.

Contributions: HG and CHM collected the clinical information and performed the laboratory studies, analyzed the data and wrote the manuscript. AHWI and WWLC reviewed the marrow samples. HCHC processed patient samples. YLK and AYHL designed the experiments, analyzed the data and wrote the manuscript.
