TIMP-1 signaling via CD63 triggers granulopoiesis and neutrophilia in mice

Disclosures: The authors declare no conflict of interest.

Contributions: J.K. designed and performed the experiments, analyzed the results, made the figures and wrote the manuscript. H.C. and B.G. performed experiments. P.S. provided the CD63 knock out mice, P.K. revised the manuscript, and A.K. designed the study, performed experiments, and revised the manuscript.
