Version 3

B cell receptor usage correlates with the sensitivity to CD40 stimulation
and the occurrence of CD4+ T cell clonality in chronic lymphocytic
leukemia

Disclosures: The authors report no potential conflicts of interest.

Contributions: AE was the principal investigator and takes primary responsibility for the paper; NZ, CH, RGe, DA, FJG and VE performed the laboratory work for this study; JPH and TK participated in the analysis; AE, TNH and RGr co-ordinated the research; NZ, RGe and AE wrote the paper.
