

Haematologica  
HAEMATOL/2014/120030  
Version 3  
Environmental determinants of severity in sickle cell disease

Disclosures: None

Contributions: All authors were responsible for the idea for the review, and planned the manuscript. Sanjay Tewari wrote the first draft of the review, incorporating sections from Valentine Brousse, Stephan Menzel and Fred Piel. Fred Piel produced the figures. David Rees revised the first draft and wrote the final version, and revised it following the Reviewers' comments. All authors corrected and approved the final submitted version.
