Version 3

The role of CD44 in fetal and adult hematopoietic stem cell regulation

Disclosures: none

Contributions: H.C., S.H. and S.N. designed and performed experiments, analyzed data and wrote the manuscript. H.C. and D.C. optimized time mating methods, performed mouse husbandry and animal experimentation. B.W. designed and performed experiments. A.O. performed the limiting dilution transplant, analyzed data for adult LT-HSC frequency and wrote the manuscript. J.N. contributed to experimental analysis and critically reviewed the manuscript.
