Version 3

Cytoskeletal perturbation leads to platelet dysfunction and  
thrombocytopenia in Glanzmann variants

Disclosures: The authors declare no conflict of interest

Contributions: PG designed research; LB, EF and DC performed experiments and analyzed the data; TAS performed molecular modeling; JEI designed experiments on megakaryocytes and analyzed the data; LB and PG wrote the manuscript; JEI and TAS critically reviewed the manuscript; PG contributed the patients to the study. All authors revised and approved the final version of the manuscript.
