Version 3

Relevant role of von Willebrand factor in neutrophil recruitment in a
mouse sepsis model involving cecal ligation and puncture

Disclosures: none

Contributions: Contribution: Shogo Kasuda performed most of the experiments, data analysis, and interpretation, and drafted the manuscript. Hideto Matsui, Shiro Ono and Ysunori Matsunari helped perform the mouse experiments. Kenji Nishio, Midori Shima and Katsuhiko Hatake provided guidance. Mitsuhiko Sugimoto conceptually designed, directed and interpreted the experiments, and wrote the manuscript.
