

Haematologica  
HAEMATOL/2015/133470  
Version 4

Combined CXCR3/CXCR4 measurements are of high prognostic value  
in chronic lymphocytic leukemia due to negative cooperativity of the  
receptors

Sylvia Ganghammer, Julia Gutjahr, Evelyn Hutterer, Peter W. Krenn,  
Susanne Pucher, Claudia Zelle-Rieser, Karin Jöhner, Maikel Wijtmans,  
Rob Leurs, Martine J. Smit, Valter Gattei, Richard Greil, and Tanja N.  
Hartmann

Disclosures: This work has been supported by the Austrian Science Fund FWF (P26421-B13 to T.N.H., International PhD program Immunity in Cancer and Allergy W1213 to R.G.), the Paracelsus Medical University Salzburg (E-13/18/093-HAR to T.N.H.), the SCRI-LIMCR GmbH, and the province of Salzburg. The authors declare no conflict of interest.

Contributions: SG, JG, EH, PWK and SP performed research; SG and TNH designed research and interpreted data; CZR and KJ contributed reagents and helped with ELISAs; MW, RL and MS provided CXCR3 agonist and antagonist and expertise; SG, TNH, RG and VG discussed data; SG, TNH and VG wrote the manuscript.
