NUP214-ABL1 fusion defines a rare subtype of B-cell precursor acute lymphoblastic leukaemia that could benefit from tyrosine kinase inhibitors

Nicolas Duployez, Guillaume Grzych, Benoît Ducourneau, Martin Alarcon Fuentes, Nathalie Grardel, Thomas Boyer, Wadih Abou Chahla, Bénédicte Bruno, Brigitte Nelken, Emmanuelle Clappier, and Claude Preudhomme

Disclosures: Nothing to disclose

Contributions: ND and NG performed SNP-array karyotyping. BD performed ligation-dependent RT-PCR. CP, NG and EC performed molecular studies. TB performed immunophenotyping and cytology. MAF and GG collected clinical data. BB, WAC and BN decided of therapeutic management. GG, ND and CP wrote the manuscript, which was approved by all authors. GG and ND contributed equally to this work.
