Impaired killing of *Candida albicans* by granulocytes mobilized
for transfusion purposes: a role for granule components

Roel P. Gazendam, Annemarie van de Geer, John L. van Hamme,
Anton T.J. Tool, Dieke J. van Rees, Cathelijn E.M. Aarts, Maartje van
den Biggelaar, Floris van Alphen, Paul Verkuijlen, Alexander B. Meijer,
Hans Janssen, Dirk Roos, Timo K. van den Berg, and Taco W. Kuijpers

Disclosures: Disclosures R.P.G was supported by the Landsteiner Foundation for Blood Transfusion Research (LSBR 1706) awarded to T.W.K. All authors approved the final manuscript revisions and declare that there are no potential conflicts (financial, professional, or personal) of relevance to the manuscript.

Contributions: Authorship T.W.K. is the principal investigators who conceived and designed the study. R.P.G., J.H., D.v.R., A v/d G, A.T.J.T, H.J., A.B.M., F.A. and C.E.M.A. performed the experiments. T.K.B and D.R. contributed to the design of the study. R.P.G. devised and performed the analyses and wrote the manuscript together with T.W.K.
