Long-term serial xenotransplantation of juvenile myelomonocytic
leukemia recapitulates human disease in Rag2^{-/-} γ c^{-/-} mice

Christopher Felix Krombholz, Konrad Aumann, Matthias Kollek, Daniela
Bertele, Silvia Fluhr, Mirjam Kunze, Charlotte M. Niemeyer, Christian
Flotho, and Miriam Erlacher

Disclosures: The authors declare no conflicts of interest.

Contributions: CFK, DB, MK and SF devised xenotransplantation protocols, performed experiments and evaluated animals. KA performed histopathology and immunohistochemistry. CMN provided patient material, clinical data and revised the manuscript. CFK, CF and ME devised research, analyzed data and wrote the manuscript.
