Version 4

Identification of a novel stereotypic IGHV4-59/IGHJ5-encoded B-cell
receptor subset expressed by various B-cell lymphomas with high
affinity rheumatoid factor activity

Richard J. Bende, Jerry Janssen, Thera A.M. Wormhoudt, Koen
Wagner, Jeroen E.J. Guikema, and Carel J.M. van Noesel

Disclosures: NA

Contributions: Contributions: R.J.B. designed the study, performed experiments, analyzed data and wrote the letter; J.J., T.A.M.W. and K.W. performed experiments and analyzed data; J.E.J.G. contributed ideas, analyzed data and wrote the letter; C.J.M.v-N designed the study and wrote the letter.
