Version 4

Functional characterization of novel ABCB6 mutations and their clinical implications in familial pseudohyperkalemia

Immacolata Andolfo, Roberta Russo, Francesco Manna, Gianluca De Rosa, Antonella Gambale, Soha Zouwail, Nicola Detta, Catia Lo Pardo, Seth L. Alper, Carlo Brugnara, Alok K. Sharma, Lucia De Franceschi, and Achille Iolascon

Disclosures: No conflict of interests to disclose

Contributions: I.A., R.R.; S.L.A. L.D.F and A.I. designed and conducted the study, and prepared the manuscript; I.A. performed the ionic flux assays; R.R. performed the sequencing analysis and blood donors screening; F.M. performed the ionic flux assays and real time PCR assays; G.D.R. performed the immunofluorescence assays and western blotting analysis; N.D. contributed to the critical evaluation of ionic flux assays; A.K.S. performed 3D prediction; C.B. contributed to the critical evaluation of the manuscript; A.G. and SF performed clinical evaluation of patients; CLP provided samples of blood donors with relative hematological parameters.
