Version 4

Immune thrombocytopenia in adults: a prospective cohort study of clinical features and predictors of outcome.

Lamiae Grimaldi-Bensouda, Clementine Nordon, Marc Michel, Jean-François Viallard, Daniel Adoue, Nadine Magy-Bertrand, Jean-Marc Durand, Philippe Quittet, Olivier Fain, Bernard Bonnotte, Anne-Sophie Morin, Nathalie Morel, Nathalie Costedoat-Chalumeau, Brigitte Pan-Petes, Mehdi Khellaf, Antoinette Perlat, Karim Sacre, François Lefrere, Lucien Abenhaim, and Bertrand Godeau

Disclosures: LGB, CN, and LA, who is also a stockowner and chairman, are currently employed by LASER, Research and Consulting Agency, an independent research organization that owns and develops the PGRx System database and working with the pharmaceutical industry, therefore collaborating with virtually any pharmaceutical company. LASER has no commercial interests in any of the products studied. Members of the LASER network have no interest in any drug or other factors studied. Private companies or agencies using PGRx for their studies obtain data by subscription. MM, JFV, DA, NMB, MK, JMD, PQ, OF, BB, NM, NCC, BPP, AP, KS, FR declare no conflicts of interest. BG has served as a consultant for Amgen and GSK and received research support from Roche, participated on advisory boards and/or as a speaker at medical education events supported by Amgen, Roche and GSK and declares no other competing financial interests.

Contributions: LGB contributed to the study design, conduct and data analysis; CN contributed to data analysis and wrote the manuscript; MM participated in the recruitment and follow-up of patients, and the writing of the manuscript; JFV, DA, NMB, MK, JMD, PQ, OF, BB, NM, NCC, BPP, AP, KS, and FL participated in the recruitment and follow-up of patients as well as data collection; LA contributed to the study design; BG contributed to the study design, participated in the recruitment and follow-up of patients, and in the writing of the manuscript. All authors read and approved the final version of the manuscript for publication.
