## Haematologica HAEMATOL/2016/150375 Version 4

Gfi1b controls integrin signaling-dependent cytoskeleton dynamics and organization in megakaryocytes

Hugues Beauchemin, Peiman Shooshtarizadeh, Charles Vadnais, Lothar Vassen, Yves D Pastore, and Tarik Möröy

Disclosures: This work was supported by grants from the Canadian Institutes of Health Research (MOP – 111247) and the Canadian Hemophilia Society. T.M. holds the Canada Research Chair (Tier 1) in Hematopoiesis and Immune Cell Differentiation. Conflict of interest to disclose: none for all authors.

Contributions: H.B., L.V. and P.S. did the experiments. H.B., Y.D.P. and C.V. did the data analysis. H.B. and T.M. wrote the manuscript. T.M. has initiated the project, oversaw the interpretation and presentation of the data and provided the funding.
