Disclosures: none

Contributions: M.R. and B.B. designed the research and wrote the paper. M.R. performed experiments; M.R. and B.R.B. analyzed results and made the figures; A.T.-S., I.O., W.K., M.S., I.N. and R.S. provided additional information on MYC rearrangement status, I.O and W.K. performed central pathology review to confirm the diagnosis, A.M. and M.S. provided pB-ALL cases, R.S. and M.L. coordinate the ICGC-MMML-Seq and the MMML-MYC-SYS projects, respectively. M.R. and M.Z. performed statistical analyses, M.R., B.R.B., J.L., A.R., W.K., I.O., M.L., R.S. and B.B. discussed and interpreted the results. A complete list of the members of the MMML-MYC-SYS and ICGC-MMML-Seq projects can be found in the data supplement of the online version of this article.
