Version 4

Amplification of mixed lineage leukemia gene perturbs hematopoiesis
and cooperates with partial tandem duplication to induce acute myeloid
leukemia

Bon Ham Yip, Chiou Tsun Tsai, Jayant K. Rane, Winston Vetharoy,
Eduardo Anguita, Shuo Dong, Michael A. Caligiuri, and Chi Wai Eric So

Disclosures: All authors declare no conflict of interest.

Contributions: BHY, CTT, JKR, WV performed experiments and analyzed the data. EA provided critical clinical samples and data. SD and MAC provided essential reagents, MLL-PTD model and data analysis. BHY and CWES wrote the manuscript. CWES designed and supervised the study.
