Reduced hematopoietic stem cells frequency predicts outcome in acute
myeloid leukemia

Wenwen Wang, Thomas Stiehl, Simon Raffel, Van T. Hoang, Isabel Hoffmann, Laura Poisa-Beiro, Borhan R. Saeed, Rachel Blume, Linda Manta, Volker Eckstein, Tilmann Bochtler, Patrick Wuchter, Marieke Essers, Anna Jauch, Andreas Trumpp, Anna Marciniak-Czochra, Anthony D. Ho, and Christoph Lutz

Disclosures: Deutsche Forschungsgemeinschaft (DFG) Dietmar Hopp Foundation The SyTASC consortium funded by the Deutsche Krebshilfe The authors declare no conflict of interest.

Contributions: W.W. and C.L. designed the research, W.W., S.R., V.T.H., I.H., B.R.S., R.B., V.E., A.J and C.L. performed experiments, W.W., S.R., L.M., L.P.B., A.J., A.D.H. and C.L. analyzed the data, T.S. and A.M.C. performed mathematical modeling, T.B. and P.W. contributed patient material, M.E. and A.T. supervised mouse experiments, T.S. wrote the mathematical modeling part, W.W. and C.L. wrote the manuscript with input from all other authors. All authors reviewed and approved the final version.
