Version 4

Amotosalen/UVA pathogen inactivation technology reduces platelet
activatability, induces apoptosis and accelerates clearance

Simona Stivala, Sara Gobbato, Laura Infanti, Martin F. Reiner, Nicole
Bonetti, Sara C. Meyer, Giovanni G. Camici, Thomas F. Lüscher,
Andreas Buser, and Jürg H Beer

Disclosures: This work was supported by the Swiss National Science Foundation grant
#310030_144152 to J.H.B. L.I. and A.B. received lecture fees from CERUS. All other
authors declare no conflicts of interest.

Contributions: S.S. designed the project, performed experiments and wrote the manuscript;
S.G., M.F.R. and S.C.M. performed experiments and contributed to manuscript
preparation; L.I. and A.B. helped in designing the study, recruited the donors and
contributed to manuscript preparation; G.C. and T.F.L. contributed to manuscript
preparation; J.H.B. obtained the funding, designed the project and wrote the manuscript.
