Version 3

Hydroxyurea differentially modulates activator and repressors of
α-globin gene in erythroblasts of responsive and non-responsive
patients with sickle cell disease in correlation with Index of Hydroxyurea
Responsiveness

Xingguo Zhu, Tianxiang Hu, Meng Hsuan Ho, Yongchao Wang, Miao
Yu, Niren Patel, Wenhui Pi, Jeong-Hyeon Choi, Hongyan Xu, Ferdane
Kutlar, Vadivel Ganapathy, Abdullah Kutlar, and Dorothy Tuan

Disclosures: 1. None 2. Work was supported by NIH P20M003383 3. None

Contributions: XZ, TH and DT designed the research, XZ, TH, MH, YW, MY, NP, SB and
WP performed research, HX did the statistical analysis, JC analyzed the bioinformatics
data, TH, XZ, VG, FK, AK and DT analyzed and interpreted the data, TH and DT wrote the
manuscript.
