Disclosures: This study was supported in part by the Deutsche Forschungsgemeinschaft (SFB 1074 project B3 to K.D. and L.B. and Heisenberg-Professur BU 1339/8-1 to L.B.) and S.H. was supported by the Studienstiftung des deutschen Volkes.

Contributions: S.H. performed and designed many of the experiments, analyzed the data and wrote the manuscript; T.J.B. created the pipeline and gave advice for all bioinformatic analyses; A.D. and L.B. designed experiments and supervised the project and L.B. wrote the manuscript; S.G., A.R. and F.K. performed the RNA-Seq of 10 healthy control samples; M.J.-L. provided RNA of FACS-sorted myeloid cells; S.C. assisted with bioinformatic analyses; J.K. gave conceptual advice for experiments and the manuscript; and P.P., V.I.G., H.D., R.F.S. and K.D. provided AML patients. All authors read and approved the manuscript.
