Version 3

Clinical severity in adult warm autoimmune hemolytic anemia and its
relationship to antibody specificity

Philippe Chadebech, Valentine Loustau, Daniel Janvier, Laetitia Languille, Julie Ripa, Marie Tamagne, Philippe Bierling, Rachid Djoudi, Bertrand Godeau, Marc Michel, France Pirenne, and Matthieu Mahévas

Disclosures: The authors have no conflict of interests to declare.

Contributions: FP and MMA were the principal investigators and take primary responsibility for the article. PC and MMA wrote the manuscript. VL, PC, JR, and LL recruited the patients and collected the clinical data. VL and PC performed the laboratory work for this study and collected and analyzed the data. MT and JR performed complementary laboratory work. VL, PC, and MMA performed the statistical analysis. PB, BG, RD, MMi and FP coordinated the research. All authors meet the criteria for contributing authors, were involved in the discussion and interpretation of data and approved the final version of the manuscript.
