Hypomorphic FANCA mutations correlate with mild mitochondrial and clinical phenotype in Fanconi anemia

Roberta Bottega, Elena Nicchia, Enrico Cappelli, Silvia Ravera, Daniela De Rocco, Michela Faleschini, Fabio Corsolini, Filomena Pierri, Michaela Calvillo, Giovanna Russo, Gabriella Casazza, Ugo Ramenghi, Piero Farruggia, Carlo Dufour, and Anna Savoia

Disclosures: This study was supported by Telethon Foundation (grant GGP11076), Cariplo Foundation (2012-0529), Italian Ministry of Health (RF-2010-2309222), AIRFA (Italian Association for Research in Fanconi anemia), ERG S.p.A., Cambiaso Risso Group, Rimorchiatori Riuniti S.p.A., and Saar Depositi Oleari Portuali S.p.A. We are grateful with the "Cell Line and DNA Biobank from Patients affected by Genetic Diseases" (G. Gaslini Institute) and Telethon Genetic Biobank Network (project no. GTB07001) for the sample providing. M.F. is supported by a fellowship (ID 19432) from AIRC (Italian Association of Cancer Research) and R.B. from "Umberto Veronesi" Foundation.

Contributions: R.B., E.N., A.S. designed the study; F.P., M.C., G.R., G.C., U.R., P.F., and C.D. collected clinical data; R.B., E.N., E.C., S.R., D.D.R., M.F., and F.C. performed laboratory analyses; R.B., E.N., C.D., and A.S. wrote the manuscript that was critically revised by all authors.
