Version 3

New pathogenic mechanisms induced by germline erythropoietin
receptor mutations in primary erythrocytosis

Florence Pasquier, Caroline Marty, Thomas Balligand, Frédérique
Verdier, Sarah Grosjean, Vitalina Gryshkova, Hana Raslova, Stefan
N. Constantinescu, Nicole Casadevall, William Vainchenker,
Christine Bellanné-Chantelot, and Isabelle Plo

Disclosures: The authors declare no disclosures

Contributions: IP, CBC designed and directed the work; FP performed most of research and analyzed data; CM, SG performed research (Western blot), FV performed research on EPO binding experiments; CP co-identified EPOR mutant in the patient. VG performed experiments. SNC contributed to intellectual input, NC was involved in clinical part, WV, HR, contributed to intellectual input and all authors contributed to writing and editing
