Plasma cell proliferative index predicts outcome in immunoglobulin light chain amyloidosis treated with stem cell transplantation

M Hasib Sidiqi, Mohammed A. Aljama, Dragan Jevremovic, William G. Morice, Michael Timm, Francis K. Buadi, Rahma Warsame, Martha Q. Lacy, Angela Dispenzieri, David Dingli, Wilson I. Gonsalves, Shaji Kumar, Prashant Kapoor, Taxiarchis Kourelis, Nelson Leung, William J. Hogan, and Morie Gertz

Disclosures: None

Contributions: H.S. designed the study, analyzed the data, wrote the first draft, and approved the final version of the manuscript. M.A. assisted in data collection, analyzed the data, revised the manuscript critically, and approved the final version. D.J. performed laboratory assessment for proliferative index, wrote the first draft, revised the manuscript critically, and approved the final version of the manuscript. W.M, M.T. performed laboratory assessment for proliferative index, revised the manuscript critically, and approved the final version of the manuscript. F.K.B., R.W., M.Q.L., A.D., D.D., W.I.G., S.K.K., P.K., T.V.K., N.L., and W.J.H performed patient management, revised the manuscript critically, and approved the final version of the manuscript; and M.A.G designed the study, analyzed the data, wrote the first draft, approved the final version of the manuscript, and performed patient management
