Dexamethasone promotes durable factor VIII -specific tolerance in
hemophilia A mice via thymic mechanisms

Maria T. Georgescu, Paul C. Moorehead, Alice S. van Velzen, Kate
Nesbitt, Birgit M. Reipert, Katharina N. Steinitz, Maria Schuster,
Christine Hough, and David Lillicrap

Disclosures: DL receives research support from Bayer Healthcare, Bioverativ, CSL-Behring and Sangamo.

Contributions: MTG designed and performed experiments, analyzed data, wrote, edited and approved the manuscript. PCM designed and performed experiments, analyzed data, wrote, edited and approved the manuscript. ASvV performed experiments, edited and approved the manuscript. KN performed experiments and approved the manuscript. KNS contributed to data analysis, edited and approved the manuscript. MS developed the animal model, coordinated its breeding and genotyping, approved the manuscript. CH analyzed data, edited and approved the manuscript. DL designed experiments, analyzed data, edited and approved the manuscript.
