Version 3

Impact of age on genetics and treatment efficacy in follicular lymphoma

Stefan Alig, Vindi Jurinovic, Alessandro Pastore, Deepak Bararia,
Sarah Häbe, Johannes C. Hellmuth, Robert Kridel, Randy Gascoyne,
Christian Schmidt, Anna Zöllner, Christian Buske, Martin Dreyling,
Michael Unterhalt, Wolfgang Hiddemann, Eva Hoster, and Oliver
Weigert

Disclosures: AP is funded by a Dr. Mildred Scheel postdoctoral fellowship of the Deutsche Krebshilfe (70111354). OW is supported by the Max-Eder Program of the Deutsche Krebshilfe (110659), and the Deutsche Forschungsgemeinschaft (DFG-SFB/CRC-1243, TP-A11). RG did consult for Celgene and Seattle Genetics, WH did consult for Roche, Janssen, Celgene and Gilead, MD did consult and received speaker's honoraria from Roche, EH received travel support from Roche, OW did consult for Roche, Incyte and Cellectia and received research funding from Roche and Novartis. All remaining authors have declared no conflicts of interest.

Contributions: SA, EH and OW designed and performed the research, analyzed data and drafted the manuscript. VJ was largely involved in statistical analyses. AP, DB, SH, JCH, RK, RG contributed to molecular data acquisition and data analyses. AZ, CS, CB and MU were involved in collecting and analyzing clinical data. MD and WH significantly contributed to the preparation of the manuscript.
