Version 6

Cyclin-dependent kinase 9 as a potential specific molecular target in
NK cell leukemia/lymphoma

Shiori Kinoshita, Takashi Ishida, Asahi Ito, Tomoko Narita, Ayako Masaki, Susumu Suzuki, Takashi Yoshida, Masaki Ri, Shigeru Kusumoto, Hirokazu Komatsu, Norio Shimizu, Hiroshi Inagaki, Taruho Kuroda, Arne Scholz, Ryuzo Ueda, Takaomi Sanda, and Shinsuke Iida

Disclosures: Shiori Kinoshita has no COI to disclose. Takashi Ishida received research funding from Kyowa Hakko Kirin Co., Ltd., Bayer AG, and Celgene K.K., and honoraria from Kyowa Hakko Kirin Co., Ltd., and Celgene K.K. Asahi Ito has no COI to disclose. Tomoko Narita has no COI to disclose. Ayako Masaki has no COI to disclose. Susumu Suzuki has no COI to disclose. Takashi Yoshida has no COI to disclose. Masaki Ri has no COI to disclose. Shigeru Kusumoto has no COI to disclose. Hirokazu Komatsu has no COI to disclose. Norio Shimizu has no COI to disclose. Hiroshi Inagaki has no COI to disclose. Taruho Kuroda is an employee of Bayer Yakuhin, Ltd. Arne Scholz is an employee of Bayer AG Pharmaceuticals Division. Ryuzo Ueda has a consultancy with Mundipharma K.K., Ono Pharmaceutical Co., Ltd., and Terumo Co., Ltd., receives research funding from Kyowa Hakko Kirin Co., Ltd.; Rikaken Co., Ltd., Medical & Biological Laboratories Co., Ltd., and Chugai Pharmaceutical Co., Ltd., and honoraria from Chugai Pharmaceutical Co., Ltd., Kyowa Hakko Kirin Co., Ltd., and Ono Pharmaceutical Co., Ltd. Takaomi Sanda has no COI to disclose. Shinsuke Iida receives research funding from Janssen, Takeda, Chugai, Kyowa Hakko Kirin, Teijin, Astellas, Toyama Chemical, Celgene, Bristol-Myers Squibb, and honoraria from Takeda, Celgene, Ono, Bristol-Myers Squibb, Novartis.

Contributions: Conception and design: S Kinoshita, T Ishida, A Ito, T Narita, A Masaki, T Kuroda, A Scholz, and R Ueda. Acquisition of data: S Kinoshita, T Ishida, A Ito, T Narita, A Masaki, S Suzuki, H Takino, T Yoshida, M Ri, S Kusumoto, H Komatsu, N Shimizu, H Inagaki, T Sanda, and S Iida. Analysis and interpretation of data: S Kinoshita, T Ishida, A Ito, T Narita, A Masaki, T Kuroda, A Scholz, T Sanda, and R Ueda. Writing the manuscript: all authors
