DOT1L inhibition blocks multiple myeloma cell proliferation by
suppressing IRF4-MYC signaling

Kazuya Ishiguro, Hiroshi Kitajima, Takeshi Niinuma, Tadao Ishida, Reo Maruyama, Hiroshi Ikeda, Toshiaki Hayashi, Hajime Sasaki, Hideki Wakasugi, Koyo Nishiyama, Tetsuya Shindo, Eiichiro Yamamoto, Masahiro Kai, Yasushi Sasaki, Takashi Tokino, Hiroshi Nakase, and Hiromu Suzuki

Disclosures: none

Contributions: H.S. and R.M. designed the study. K.I., H.K., T.N. and M.K. performed experiments. K.I., T.N. and R.M. performed data analysis. K.I. and H.S. wrote the manuscript. H.I., T.H., H.S., H.W., K.N., T.S., E.Y., Y.S. and T.T. contributed reagents and materials. T.I. and T.N. obtained funding. H.N. supervised the study. All authors reviewed and approved the final manuscript.
