Version 3

Hypersensitivity reactions to asparaginase in mice are mediated by anti-asparaginase IgE and IgG and the immunoglobulin receptors Fc ϵ RI and Fc γ RIII.

Sanjay Rathod, Manda Ramsey, Mary V. Relling, Fred D. Finkelman,
and Christian A. Fernandez

Disclosures: The authors have no disclosures.

Contributions: C.A. Fernandez, F.D. Finkelman, and S. Rathod contributed to the experimental design of the research; S. Rathod and M. Ramsey performed experiments; C.A. Fernandez, S. Rathod, F.D. Finkelman, and M.V. Relling analyzed the data; and all authors contributed to the writing of the manuscript.
