HAEMATOL/2018/208926
Version 2

Long noncoding RNAs of single hematopoietic stem and progenitor
cells in healthy and dysplastic human bone marrow

Zhijie Wu, Shouguo Gao, Xin Zhao, Jinguo Chen, Keyvan Keyvanfar,
Xingmin Feng, Sachiko Kajigaya, and Neal S. Young

Disclosures: The Authors would like to acknowledge the support of the Trans-NIH Center for Human Immunology, Autoimmunity, and Inflammation (National Institute of Allergy and Infectious Diseases, NIH, Bethesda, MD, USA). We would like to thank patients and healthy volunteers who donated BM. Sequencing and technical support were provided by the DNA Sequencing and Genomics Core of NHLBI. FACS sorting were provided by Keyvan Keyvanfar and Flow Cytometry Core of NHLBI. This research was supported by the Intramural Research Program of the National Heart, Lung, and Blood Institute.
