Version 3

High-throughput elucidation of thrombus formation reveals sources of  
platelet function variability

Johanna P. van Geffen, Sanne L.N. Brouns, Joana Batista, Harriet McKinney, Carly Kempster, Magdolna Nagy, Suthesh Sivapalaratnam, Constance C. F. M. J. Baaten, Nikki Bourry, Mattia Frontini, Kerstin Jurk, Manuela Krause, Daniele Pillitteri, Frauke Swieringa, Remco Verdoold, Rachel Cavill, Marijke J.E. Kuijpers, Willem H. Ouwehand, Kate Downes, and Johan W.M. Heemskerk

Disclosures: 1. Support was obtained from the Cardiovascular Centre (HVC), Maastricht University Medical Centre+, Interreg Euregio Meuse-Rhin (Polyvalve), the National Institute for Health Research (NIHR) Cambridge Biomedical Research Centre and the National Health Service Blood and Transplant (NHSBT). KD is supported as a HSST trainee by Health Education England. 2. No support received from commercial entities 3. No patents are used

Contributions: J.P.v.G. performed experiments, analysed the data and wrote the manuscript. S.L.B., J.B., H.M., C.K., P.T., C.C.B., N.B., M.N. and M.J.K. performed experiments and analysed data. F.S. and R.V., analysed the data. S.S. and M.F. provided expert supervision. K.J., M.K. and D.P. provided essential tools. R.C. supervised data management. W.H.O., J.W.H. and K.D. provided expert supervision and wrote the manuscript. All authors read and approved the final version of the manuscript.
