The promise of CD4+FoxP3+ regulatory T cell manipulation in vivo:
applications for allogeneic hematopoietic stem cell transplantation

Sabrina Copsel, Dietlinde Wolf, Krishna V. Komanduri, and Robert B.
Levy

Disclosures: RBL is a scientific advisory board member of Heat Biologics and a consultant for Heat Biologics and Pelican Therapeutics. KVK has served as an ad hoc consultant to Kite/Gilead, Novartis, Celgene, Sanofi Genzyme, Malinckrodt, Kirin Kyowa Pharmaceuticals, Incyte and Regimmune. He has no permanent advisory roles nor equity positions relevant to this review.

Contributions: SC and DW equally contributed to the preparation of the manuscript. KK critiqued the manuscript and RBL helped write and edit the manuscript.
