Version 3

Recurrent stroke: the role of thrombophilia in a large international
pediatric stroke population

Gabrielle deVeber, Fenella Kirkham, Kelsey Shannon, Leonardo Brandão, Ronald Sträter, Gili Kenet, Hartmut Clausnizer, Mahendranath Moharir, Martina Kausch, Rand Askalan, Daune MacGregor, Monika Stoll, Antje Torge, Nomazulu Dlamini, Vijeja Ganesan, Mara Prengler, Jaspal Singh, and Ulrike Nowak-Göttl

Disclosures: All investigators (deGA, KFJ, SK, SR, KG, MM, DN, BLR, KM, AR, SM, GV, PM, SJ and NGU) took part in the design, execution, ascertainment of recurrence and/or data analysis, and in writing the report. SK and deVGA were responsible for data management in the Canadian stroke database, KFJ for the UK database and CH and NGU for the German stroke registry. TA and NGU were responsible for statistical calculations. The authors have nothing to disclose.
