Version 3

Dimeric ferrochelatase bridges ABCB7 and ABCB10 homodimers in an  
architecturally defined molecular complex required for heme  
biosynthesis

Nunziata Maio, Ki Soon Kim, Gregory Holmes-Hampton, Anamika  
Singh, and Tracey A. Rouault

Disclosures: The authors declare no competing financial interests.

Contributions: N.M. designed the project, performed experiments, analyzed the data and wrote the manuscript. K.S.K, G.H-H., A. S. performed experiments and analyzed the data. T.A.R. supervised the study, analyzed the data and wrote the manuscript.
