New thiazolidinones reduce iron overload in mouse models of
hereditary hemochromatosis and β -thalassemia

Jing Liu, Wei Liu, Yin Liu, Yang Miao, Yifan Guo, Haoyang Song, Fudi
Wang, Hongyu Zhou, Tomas Ganz, Bing Yan, and Sijin Liu

Disclosures: There are no conflict of interests to disclose.

Contributions: Jing Liu: performed experiments, analyzed data and wrote the paper. Wei Liu: performed experiments and analyzed data. Yin Liu, Hongyu Zhou and Bing Yan designed and prepared the compound library, helped perform screening, and wrote the paper. Yang Miao, Yifan Guo and Haoyang Song performed experiments, analyzed data and edited the paper. Fudi Wang contributed important advice and vital reagents. Tomas Ganz: analyzed data, provided vital reagents and wrote the paper. Sijin Liu: designed the study, directed the research, and wrote the paper.
