Version 3

TP53, ETV6 and RUNX1 germline variants in a case series of patients
developing secondary neoplasms after treatment for childhood acute
lymphoblastic leukemia

Stefanie V. Junk, Norman Klein, Sabine Schreek, Martin Zimmermann,
Anja Möricke, Kirsten Bleckmann, Julia Alten, Elif Dagdan, Gunnar
Cario, Christian P. Kratz, Martin Schrappe, and Martin Stanulla

Disclosures: The authors declare no competing financial interests.

Contributions: S.S. and S.J. performed experiments; S.J. made the figures and analyzed the data with M.Z., A.M., J.A., E.D. and K.B.; N.K. and S.J. developed a Python script for quality control and filtering of the variants; S.J., M. Stanulla, G.C., C.P.K, and M. Schrappe designed the research, provided and reviewed data, and wrote the paper.
