Bone marrow endothelial cell-derived interleukin-4 contributes to
thrombocytopenia in acute myeloid leukemia

Ai Gao, Yuemin Gong, Caiying Zhu, Wanzhu Yang, Qing Li, Mei Zhao,
Shihui Ma, Jianyong Li, Sha Hao, Hui Cheng, and Tao Cheng

Disclosures: none

Contributions: A.G. and Y.G. designed and performed all the experiments, analyzed the data and wrote the manuscript. C.Z. helped with transcriptomics analysis. W.Y. helped with image capture and statistics. Q.L. and M.Z. helped with the mouse experiments. H.C. and S.H. designed all experiments, analyzed the data and wrote the manuscript. T.C. conceived the study, designed the experiments, interpreted the results, wrote the paper and oversaw the research project.
