Holm H Uhlig, and Sophie Hambleton

Disclosures: 1. We thank the patient's family, volunteers and blood donors for participation in this study. This work was supported by the MRC/ESPRC Newcastle Molecular Pathology Node, with technical assistance from Anna Long and Claire Jones. We acknowledge the contributions of the National Institute for Health Research (NIHR) Newcastle Biomedical Research Centre (BRC) and the BRC Gastrointestinal Biobank (16/YH/0247), which is supported by the NIHR Oxford Biomedical Research Centre. HHU is additionally supported by the Leona M. and Harry B. Helmsley Charitable Trust, and the Crohn's & Colitis Foundation of America. SH is supported by the Sir Jules Thorn Trust, Bubble Foundation and the Wellcome Trust (WT). CAL is supported by the NIHR. KO is funded by the MRC, WT, BBSRC and GSK. ACh is supported by WT and GSK. The views expressed are those of the authors and not necessarily those of the NHS, the NIHR or the Department of Health. 2. HHU received research support or consultancy fees from UCB Pharma, Eli Lilly, Boehringer Ingelheim, Pfizer, Celgene and AbbVie. SH received consultancy fees from UCB Pharma and a speaking honorarium from Biotest. KO and ACh report research grants from GSK (funding KC); KO reports personal fees from Karus (scientific advisory board), and speaker fees from Gilead, during the conduct of the study. DA reports grants from Eli Lilly and Company, and from UCB Pharma, during the conduct of the study. CAL received research support from Genentech and Roche. Other authors have no conflict of interest to report.

Contributions: DAS, DA, CAL, KRE, HHU and SH designed experiments, analysed data and wrote the paper. DAS, DA, CAL, KC, SP, RC, A Cavounidis, CDC and MA performed experiments. JC, YD, NK and CDC contributed essential tools and techniques. SN, AJC, PDA and SH provided clinical care. A Chandra and KO designed experiments. All authors reviewed the paper.
