Version 3

Autoimmunity associated with Erdheim-Chester disease improves with
BRAF/MEK inhibitors

Anaïs Roeser, Fleur Cohen-Aubart, Paul Breillat, Makoto Miyara,
Jean-François Emile, Frédéric Charlotte, Jean Donadieu, Zahir
Amoura, and Julien Haroche

Disclosures: The authors declare that they have no conflicts of interest to disclose.

Contributions: F.C.A., Z.A., and J.H. designed the study. A.R., F.C.A., P.B., M.M., J.F.E., F.Ch., and J.H. collected the data. J.F.E. and F.Ch. centrally reviewed the histological samples. J.F.E. determined the BRAF status. A.R. and F.C.A. conducted the statistical analysis. A.R., F.C.A., Z.A., and J.H. analyzed and interpreted the data. A.R., F.C.A., Z.A. and J.H. wrote the manuscript. All authors critically reviewed and approved the final version of the manuscript.
