Non-genotoxic MDM2 inhibition selectively induces pro-apoptotic p53
gene signature in chronic lymphocytic leukemia cells

Carmela Ciardullo, Erhan Aptullahoglu, Laura Woodhouse, Wei-Yu Lin,
Jonathan P. Wallis, Helen Marr, Scott Marshall, Nick Bown, Elaine
Willmore, and John Lunec

Disclosures: The authors declare no potential conflicts of interest to disclose.

Contributions: C.C. performed experiments, analysed data and wrote the manuscript. E.A. and L.W. performed experiments. W-Y.L. performed clustering analysis. J.P.W., H.M. and S.M. recruited patients and provided clinical information. N.B. analysed cytogenetic abnormalities and provided clinical information. E.W. and J.L. designed the research, secured funding and edited the manuscript.
