CDCA7 finely tunes cytoskeleton dynamics to promote lymphoma  
migration and invasion

Carla Martín-Cortázar, Yuri Chiodo, Raul Jiménez-P., Manuel Bernabé,  
María Luisa Cayuela, Teresa Iglesias, and Miguel R. Campanero

Disclosures: None

Contributions: MRC conceived and designed the study. CM-C performed most of the experiments with contributions from YC and RJ-P. MB and MLC performed research in zebrafish. MLC and TI provided experimental support and ideas for the project. CM-C and MRC analyzed the data with contributions from all other authors. MRC wrote the manuscript with contributions from CM-C, MLC and TI. All authors approved the manuscript.
