Genomic profiling of primary histiocytic sarcoma reveals two molecular subgroups

Caoimhe Egan, Alina Nicolae, Justin Lack, Hye-Jung Chung, Shannon Skarshaug, Thu Anh Pham, Winnifred Navarro, Zied Abdullaev, Nadine S Aguilera, Liqiang Xi, Svetlana Pack, Stefania Pittaluga, Elaine S Jaffe, and Mark Raffeld

Disclosures: none

Contributions: C.E. analyzed the data and wrote the paper; A.N. selected cases and performed nucleic acid extraction; J.L. performed bioinformatic analysis and revised the paper; H-J.C. designed and performed RT-PCR experiment; S.S., Z.A. and S.P. performed and interpreted the FISH; T.A.P. and W.N. performed nucleic acid extraction and clonality analysis; L.X. analyzed data and revised the paper; E.S.J and S.P. reviewed the cases and revised the paper; N.S.A. contributed and reviewed a case; M.R. analyzed the data and wrote the paper. All authors reviewed the manuscript.
