Version 4

Novel variants in Iranian individuals suspected to have inherited red blood cell disorders, including bone marrow failure syndromes

Maryam Neishabury, Maghsood Mehri, Zohreh Fattahi, Hossein Najmabadi, and Azita Azarkeivan

Disclosures: This work was supported by a grant (95/801/t/27130) from The Deputy of Research, University of Social Welfare and Rehabilitation Sciences (USWR) and also a grant (95849843) from Iranian National Science Foundation (INSF).

Contributions: Maryam Neishabury designed the study, applied and obtained the grants, supervised the laboratory work and data analysis and wrote the manuscript. Maghsood Mehri performed laboratory work and NGS data analysis. Zohreh Fattahi contributed to NGS data analysis. Hossein Najmabadi was molecular diagnostics adviser, providing the molecular diagnostics data prior to NGS. Azita Azarkeivan was the haematologist/oncologist adviser, recruited the patients and provided their clinical and haematological information.
