SETDB1 mediated histone H3 lysine 9 methylation suppresses
MLL-fusion target expression and leukemic transformation

James Ropa, Nirmalya Saha, Hsiangyu Hu, Luke F. Peterson, Moshe
Talpaz, and Andrew G. Muntean

Disclosures: This work was supported by NIH grants R01-HL-136420 (AGM), T32CA140044 (JR) and P30CA046592 (University of Michigan Flow Cytometry Core). The authors have no conflicts of interest to declare.

Contributions: AGM and JR designed the study and wrote the paper. JR, NS, and HH performed experiments. MT and LFP contributed experimental materials and intellectual input. JR performed bioinformatics analyses. NS and HH contributed equally to this study.
