A mutated factor X activatable by thrombin corrects bleedings in vivo in a rabbit model of antibody-induced hemophilia A

Toufik Abache, Alexandre Fontayne, Dominique Grenier, Emilie Jacque, Alain Longue, Anne-Sophie Dezetter, Béatrice Soulliart, Guillaume Chevreux, Damien Bataille, Sami Chtourou, and Jean-Luc Plantier

Disclosures: All authors were full-time employees of LFB Biotechnologies when work was performed. Some of the authors (T.A./S.C./J.-L.P.) hold patents on Actiten molecule. Main Patent: Mutants du Facteur X. PCT/ FR2014/050191

Contributions: TA and AF designed experiments and corrected the paper. ASD, DG, AL, BS performed experiments and checked the manuscript. EJ designed and performed in vivo experiments, corrected the paper. GC. designed MS analysis, corrected the paper. DB designed DSP. SC oversaw the project. JLP oversaw the project, designed experiments and wrote the paper.
