Cyba-deficient mice display an increase in hematopoietic stem cells
and an overproduction of immunoglobulins

Rodrigo Prieto-Bermejo, Marta Romo-González, Alejandro
Pérez-Fernández, Ignacio García-Tuñón, Manuel Sánchez-Martín, and
Ángel Hernández-Hernández

Disclosures: The authors declare no conflict of interest

Contributions: RPB performed experiments, analysed data, assembled figures, revised the manuscript. MRG and APF performed experiments and revised the manuscript. IGT and MSM generated the Cyba^{-/-} mice. AHH conceived and designed experiments, performed experiments, analysed data and wrote the manuscript.
